

## Jump into Spring

Spring is such a welcome time of year with longer and warmer days, new growth appearing on trees and foliage of every variety. The return of songbirds pulls my heart to join their joyous songs.

Most often when the Bible speaks of spring it is in reference to the spring rains that produces new life and fresh growth. I could use a bit of that in my spiritual life as well. But growth isn't always easy, and quite often messy!

Spring is also a messy time. When the snow first disappears the underlying debris isn't always pleasant! The same spring rains that bring all that new growth also create mud puddles.

Wonderfully messy spring! Yes!!!

My package for you today is (hopefully) wonderfully messy, as well.

- An agamograph for the young and young at heart to color and play around with.
- A bookmark
- An infographic with Scripture verses about spring rains
- Two writing prompts for authors and would-be authors. Have fun and let your creative side roll. (I would love to read your responses.)  
These were both taken from a wonderful book, *The Write Brain Workbook* by Bonnie Neubauer, which our writing group uses for exercises.
- And a random coloring page, Sing Praises, simply because spring is such a happy time for me

As usual, feel free to copy and use any of these as you wish (without alterations).

Bless you all!
